

Epson Stylus® Pro 7900 and 9900

REDEFINING THE FUTURE OF PRINTING

Our Next Generation.

For more than a decade, Epson has set the standard by which all other photographic printing technologies are judged. So, when we decided to develop an entirely new generation of photographic printing technology, the significance of this effort inspired our engineers to rethink everything.

Introducing the all-new Epson Stylus Pro 7900 and 9900 printers.

Representing our next generation, the Epson Stylus Pro 7900 (24-inch) and Epson Stylus Pro 9900 (44-inch) incorporate our latest achievements in photographic ink jet technology. By combining the precision of our MicroPiezo TFP™ print head with the extraordinary performance of Epson UltraChrome® HDR Ink, our newest generation of Epson Stylus Pro printers continues to represent a level of technology unprecedented in Epson's history.

Epson UltraChrome HDR represents our latest generation of pigment ink technology. Now utilizing ten colors — including an all-new Orange and Green — Epson UltraChrome HDR Ink produces the widest color gamut ever from an Epson Stylus Pro printer. Even more remarkable, combining Epson UltraChrome HDR Ink with our new Epson AccuPhoto™ HDR screening technology dramatically raises the level of print quality and once again sets a new benchmark standard for photographic reproduction.

Our advanced Epson MicroPiezo TFP print head is capable of producing higher quality prints, at speeds almost twice as fast as our previous generation. And, with our latest ink-repelling coating and auto nozzle verification technologies, clogged nozzles are virtually eliminated.

For the first time on an Epson Stylus Pro series printer, Epson has incorporated an optional, high performance, in-line spectrophotometer, developed in partnership with X-Rite®. When driven by the latest front-end RIPs Epson SpectroProofer™ can automate any color management process in your commercial proofing workflow.

Capable of handling virtually any media type, in roll or cut sheet, up to 24 or 44 inches wide, Epson sets the standard for professional media use. Whether producing sellable color or black-and-white photography, fine art reproduction, or producing color accurate commercial and flexographic proofs for client approvals, never before have Creative Professionals had such powerful tools, allowing them to produce their vision without compromise.

With every new introduction of an Epson Stylus Pro printer, we continue to innovate and refine the overall experience. With the introduction of our latest Epson Stylus Pro 7900 and 9900 printers, Epson is once again redefining what's possible from photographic ink jet printing.

Welcome to our next generation.

Epson UltraChrome HDR Ink

Epson has set a new standard in professional-level ink technologies by utilizing ten colors, including an all-new Orange and Green.

Epson MicroPiezo TFP Print Head

Extreme printing performance and dot placement accuracy. Quite possibly the most advanced ink jet print head technology ever developed.

Epson ePlaten™ Technology

Highly accurate, automatic media loading and handling. Combined with fast, spindle-free roll media support for less chance of media damage.

Epson Stylus Pro 7900 – 24"
Puzzle Photograph by Jeff Schewe

Our Next Generation of Photographic Printing

- A new standard has been set with Epson UltraChrome HDR Ink technology
- Extreme color gamut, especially within the midtone-to-highlight color ranges
- Epson AccuPhoto HDR screening redefines photographic accuracy, color and clarity
- The combination of these technologies represents a significant improvement in photographic ink jet printing

Photograph by Howard Schatz

Epson Stylus Pro 9900 – 44"

Epson SpectroProofer 24 and 44 – Powered by X-Rite

- Optional 24- or 44-inch wide spectrophotometer developed jointly with X-Rite
- Simple installation; fits cleanly into the front of the Epson Stylus Pro 7900 or 9900
- Incorporates a high performance X-Rite ILS20 spectrophotometer for extreme measurement accuracy below 0.2 dE94
- UV-cut and non-UV-cut versions available at the time of purchase
- Both black and white interchangeable backing plates included
- Built-in print dryer to accelerate the dry-down and reading process
- When driven by the latest front-end RIP software, the Epson SpectroProofer can automate virtually any color management process in your workflow

Rethink Commercial and Flexography Proofing

- Quite possibly the highest quality proofing system available today
- Extreme color gamut makes it possible to hit spot and client-specific colors accurately
- Compatible with the widest range of certified proofing media in the industry
- Superior color consistency, proof after proof and day after day
- Legendary Epson durability for virtually maintenance-free proofing 24/7
- Capable of managing higher proofing volumes for increased productivity
- Compatible with most leading third-party RIPs and workflows
- Capable of proofing almost any other printing method – even package and label printing

Advanced Print Head Technology

High-Precision Ten-Channel Epson MicroPiezo TFP Print Head

- Thin Film Piezo (TFP) print head design capable of handling ten separate ink channels
- One-inch wide, high performance print head with 360 nozzles per channel
- Auto-sharing black ink channel technology
- Low vibration meniscus control for highly accurate dot shape and placement
- All-new ink repelling coating for dramatically reduced nozzle clogging
- Produces variable-sized droplets as small as 3.5 picoliters to greatly decrease print times while optimizing photographic quality

Epson AccuPhoto HDR Screening

- Advanced ten-color screening algorithm resulting in prints with superior color and clarity
- Maximum resolution of 2880 x 1440 dpi for incredibly sharp text and line art
- Produces extremely fine blends and photographic transitions
- Extremely accurate highlight-to-shadow details
- No visible photographic graininess due to the printing process¹
- Ensures consistent color balance regardless of the viewing light source
- When combined with the precise dot placement accuracy of the Epson MicroPiezo TFP print head, overall photographic print quality is dramatically improved

Automatic Print Head Alignment

- Built-in sensor performs highly precise alignments of all color channels
- Aligns both single- and bi-directional print modes

Automatic Nozzle Verification and Cleaning

- Embedded sensors quickly verify nozzle status without using media and automatically clean the print head if required

Epson UltraChrome HDR Ink Technology

Next Generation Ten-Color Pigment-Based Ink System

- Unique High Dynamic Range (HDR) pigments for an extremely wide color gamut
- Ten-color printing system including all-new Orange and Green inks
- Designed to work with Epson AccuPhoto HDR screening technology
- Professional print permanence ratings
- Outstanding short-term color stability for mission-critical proofing applications
- Improved Microcrystal Encapsulation™ technology for reduced gloss differential
- Improved black density up to 2.5 with an L* value ~2.8²

Three-Level Black Ink Technology

- Simultaneously uses Black, Light Black, and Light Light Black inks
- Significantly improves the gray balance while eliminating color casts
- Outstanding highlight-to-shadow grayscale accuracy for a smoother tonal range
- Virtually eliminates any bronzing of basic pigment chemistry
- Enhances the ICC profiling process for ColorSync™ and ICM™ workflows

Automatic Black Ink Mode Switching

With both Photo and Matte Black ink cartridges installed simultaneously, the Epson Stylus Pro 7900 and 9900 series printers automatically utilize the optimal black ink mode, delivering maximum black density for the chosen media. Taking advantage of the Epson MicroPiezo TFP auto-sharing black ink channel ensures a fast and efficient switch. And, to further reduce switching errors, the user can now confirm the switching process from the front control panel.

The standard Photo Black ink mode can be used for any media type with professional results. However, for certain Epson media types such as Velvet Fine Art, Enhanced Matte and UltraSmooth® Fine Art, using the Matte Black ink mode will dramatically increase your black optical density for even better print quality.

Advanced Black-and-White Printing Technology

- Unique driver technology takes full advantage of our three-level black system to produce professional black-and-white prints from color or grayscale image files
- Advanced Epson screening technology developed specifically for black-and-white printing
- Produces a truly consistent image with no color crossovers or color casts
- Capable of fine-color adjustment for truly custom black-and-white prints
- Some of the world's greatest black-and-white prints are being produced with this technology

Photograph by Lois Greenfield

Next Generation Print Engine Technology

Professional Media Handling

- Compatible with virtually any media type, in roll or cut sheet, up to 24 or 44 inches wide
- Accurate loading of cut-sheet media up to 1.5 mm thick posterboard
- All media is front-loaded via a unique straight-through media path
- Printer and driver based media identification and synchronization system for virtually error-free media use
- Media bin safely captures multiple prints up to 24" x 36" or 44" x 36"
- Optional Automatic Take-up Reel System for unattended production of large print runs (available on the Epson Stylus Pro 9900 only)

Epson ePlaten Media Loading Technology

- Accurate automatic media loading, movement, skew adjustment and tracking
- Electronically controlled roll media back tension
- Automatic roll media rewind upon media release
- Simplifies the overall roll and cut-sheet media loading process

Spindle-Free Roll Media Loading

- User-adjustable roll media adapters accept either 2- or 3-inch media cores
- Simple tension lever ensures quick and secure media core loading
- Designed with Epson ePlaten Technology for highly accurate roll media usage
- Additional media adapter pairs available as accessories for efficient roll media switching

Roll Media Length Tracking and Identification System

- Realtime automatic remaining roll media length counter
- Auto bar code tagging of remaining roll media information for faster reloading
- Very useful for tracking partially used media rolls

High Performance Rotary Cutting System

- Durable rotary cutter, designed to be virtually maintenance free
- High performance cutting speeds – cuts 24" to 44" wide rolls in under two seconds

- Off-carriage cutting system eliminates media dust within critical components
- Capable of cutting virtually any media type, including most canvas and fine art papers

Epson Intelligent High-Capacity Ink System

- Pressurized ink cartridge technology ensures reliable ink delivery at all print speeds, while dramatically reducing the physical size of the ink cartridges
- Eleven individual ink cartridges; available in 150 ml, 350 ml, and 700 ml fill capacities
- On-the-fly ink cartridge replacement for increased productivity
- Mix and match across all three ink cartridge sizes

Easy-to-Use Front Control Panel

- High resolution, 2.5-inch color LCD for improved viewing of printer status
- Simple button layout for all navigation and basic printer functions

Superior Connectivity

- Standard connectivity includes one Hi-Speed USB 2.0 and one 10/100 BaseT Ethernet port
- Professional Epson Photographic Drivers for Macintosh® and Windows®
- Fully supported by most leading third-party software RIPs and workflows

myEpsonPrinter.com^{SM 3}

- Advanced web-based printer information and management system
- Automatically tracks consumables usage and print job information, regardless of location
- Provides real-time cost-per-print estimates and print-job-run information
- Creates various reports using actual print job information
- Provides remote printer monitoring and alert capability
- Secure information management using the latest encryption technologies
- True web-based, fleet-wide printer management via secure, web-based account

World-Class Service and Support

- Includes one year of limited coverage under the Epson PreferredSM Protection Plan with toll-free telephone support available Monday through Friday and usually next-business-day, on-site service
- Optional one- or two-year Epson Preferred Plus service plans available

High Performance Print Engine Speeds

Utilizing our latest print head technology, the Epson Stylus Pro 900 series printers are among the fastest in the industry.

Print Mode ^A	16" x 20"	20" x 30"	40" x 60"
Fine – 720 dpi HS	2:53	5:03	15:26
Superfine – 1440 dpi HS	3:47	6:39	24:20
SuperPhoto – 2880 dpi HS	7:14	12:52	40:05
HS = High-speed Print Mode (Bi-directional Print Mode) Print speeds are shown in min:sec.			

¹ Photographic graininess could still be visible if present in the actual file being printed.

² Dmax and L* values are based on Epson Exhibition Fiber Paper.

³ Fees may apply. Visit www.myepprinter.com for details.

Epson Stylus Pro 7900 and 9900 Print Engine Specifications

Printing Technology

Advanced MicroPiezo TFP print head
with ink repelling coating technology
10-channel, drop-on-demand, ink jet print head
11-cartridge (O, G, C, Lc, VM, VLM, Y, Lk, LLk + PK or MK)
Auto head alignment and cleaning technology
Auto sharing black ink channel
Epson UltraChrome HDR ink technology
Professional-level pigment-based ink technology

Nozzle Configuration

Color and Monochrome 360 nozzles x 10

Droplet Technology

Smallest droplet size 3.5 picoliters
Variable Droplet Technology produces up to three different droplet sizes per print line

Resolution

2880 x 1440 dpi; 1440 x 1440 dpi; 1440 x 720 dpi;
720 x 720 dpi; 720 x 360 dpi; 360 x 360 dpi

Print Engine Speed^A

16" x 20" prints from 2:53 to 7:14	—	Normal is 3:47
20" x 30" prints from 5:03 to 12:52	—	Normal is 6:39
40" x 60" prints from 15:26 to 40:05	—	Normal is 24:20

Acoustic Noise Level

Approximately 50 dB(A) according to ISO 7779

Operating Systems Supported

Macintosh	Tiger 10.4.9 or higher (universal binary) Leopard 10.5 or higher (16 bit image file support)
Windows	Vista and XP (both 32 and 64-bit supported)

Printer Interfaces

Includes as standard one Hi-Speed USB 2.0 (1.1 compatible)
and one Ethernet Port (10/100Base-T)

Dimensions

SP7900	54" (W) x 48" (H) x 27" (D) Weight: 187 lbs
SP9900	74" (W) x 48" (H) x 27" (D) Weight: 256 lbs

Dimensions and weight include printer stand

BorderFree[®] Printing

Left and right borderless "bleed" printing for the following roll media widths:

SP7900	10", 13", 16", 17", 24"
SP9900	10", 13", 16", 17", 24", 36", 44"

Top and bottom edges can be automatically cut to any length when printing on roll media.

Optional SpectroProofer

Carriage mechanism	24" or 44" wide
Spectrophotometer	X-Rite ILS20
Measurement accuracy	Below 0.2 dE94
Minimum patch size	7.9 mm x 7.9 mm
Measurement time	15 patches per second
UV handling	UV and UV-cut version available (at time of order)
Backing color	White and black backing plates included
Workflow integration	Most leading third party RIPs and workflows

Printable Area

Maximum paper width	SP7900 – 24"	SP9900 – 44"
Maximum printable width	SP7900 – 24.16"	SP9900 – 44.16"
Left and right margins	0 to 3 mm each (0.24" total)	
Maximum printable length	Limited by application, OS, and driver/RIP used	
Minimum paper width	210 mm (8.27")	

Media Handling

SP7900	Media input Cut-sheet size	Single roll up to 24" width Up to 24" wide media (auto-loading)
SP9900	Media input Cut-sheet size	Single roll up to 44" width Up to 44" wide media (auto-loading)
	Roll media take-up reel (SP9900 only)	Auto forward and backward; Light-based media tension sensor
	Media core compatibility	User-adjustable roll media adapters accept either 2" or 3" media cores
	Max. roll media diameter	6" (when using a 3" core)
	Media weight	12 lb bond (0.8 mm), up to 1.5 mm posterboard
	Minimum sheet size	210 mm x 279 mm / 8.27" x 11"
	Built-in media cutter	Rotary cutting, automatic and manual

Epson Intelligent Pressurized Ink Cartridges^B

Starter cartridge fill volume	110 ml x 11 total colors (used for initial fill at setup)
Replacement cartridge fill volume	150 ml, 350 ml or 700 ml, each color x 11 colors total
Ink cartridge shelf life (recommended)	2 years from printed production date or 6 months after open

Lightfastness Ratings^C

Epson UltraChrome HDR Ink	Color: Up to 200 years B&W: Over 200 years
---------------------------	---

Epson PreciseColor[™] Manufacturing

In order to ensure consistent printing between multiple Epson Stylus Pro printers of the same model, Epson has refined the manufacturing process to include colorimetric calibration. This process evaluates and adjusts each printer's performance at the manufacturing stage, ensuring consistent color output from printer to printer and print to print.

Product/Accessories

	Part Numbers SP7900	SP9900
Epson Stylus Pro Printer	SP7900HDR	SP9900HDR
Epson SpectroProofer UV-Cut filter version	SPECTRO24 SPECTRO24UV	SPECTRO44 SPECTRO44UV
Automatic Take-up Reel System	Not Available	C12C815721
Replacement 44" Take-up Reel Core	Not Available	C815121
Additional Roll Media Adapters	C12C811241	C12C811241
Replacement Printer Cutter Blade	C12C815331	C12C815331
Replacement Ink Maintenance Tank	C12C890191	C12C890191

Extended Service Programs

Additional One-year Epson Preferred Plus service	EPP900B1	EPP900B1
Additional Two-year Epson Preferred Plus service	EPP900B2	EPP900B2

Green ink cartridge	T642B00	T596B00	T636B00

A Based upon print engine speed only. Total throughput times depend upon front-end RIP, file size, printer resolution, ink coverage, networking, etc. Normal Mode based on SuperFine – 1440 dpi.

B Cartridge yields are based on continuous printing of a suite of five black and color pages as required by ISO/IEC 24711 and 24712. Actual yields will vary considerably for reasons including images printed, print settings, temperature and humidity. Yields may be lower when printing infrequently or predominantly with one ink color. A variable amount of ink remains in the cartridges after the "replace cartridge" signal. Part of the ink from the first cartridges is used for priming the printer. Ink is used for both printing and print head maintenance. All inks are used for both black and color printing. For more information about yields for this printer, see www.epson.com/cartridgeinfo

C Ink lightfastness rating based on accelerated testing of prints on specialty media displayed indoors under glass. Actual print stability will vary according to media, printed image, display conditions, light intensity, humidity and atmospheric conditions. Epson does not guarantee longevity of prints. For maximum print life, display all prints under glass or lamination or properly store them. Visit www.wilhelm-research.com for the latest information.
